Role mapping and how to read this matrix

The Standards assign duties to the caregiver (the agency — its Management Actions) and to staff members (Program Practices). ECC maps agency Management Actions to the PM (with the ED for corporate items), day-to-day coordination of Program Practices to the PC, and direct-care practices to YCWs under PC oversight. "SHSS-Mandated Timing" states only what the Standards themselves require; "ECC Due Date / Cycle" is ECC's internal deadline for meeting it — where SHSS says "timely" or "regular" without a date, the ECC column sets the operating target. Contract Schedule A and licensing conditions may add stricter requirements and always prevail.

Section A — Purpose and Function
